

Abstract:

1. In our narrow definition, "the appearance of UFO" equals "the existence of aliens"
2. The US government released they found 144 cases of UFO, but only one case has been explained.
3. There are also many written records about UFOs (Ancient Egypt and Ancient China).

We will analyze the view of "existence of aliens" on three scales from small to large.

They are: the earth, the Milky Way, and the outer universe

We know nothing about aliens. In our language environment, we usually associate UFOs with aliens.

In our narrow definition, aliens on the earth are aliens who come to the earth by UFO.

The appearance of UFO is a necessary and sufficient condition for the existence of aliens

So what I am discussing is the case of UFO found on the earth to prove the existence of aliens.

The US government released a landmark report on June 25, examining 144 unidentified aerial phenomena in the past 20 years. The 144 unidentified aerial phenomena evaluated in the report all came from observation reports of various departments of the US government, mainly the military, and the time span spanned from November 2004 to March 2021. Of the 144 UAP sightings, 143 are still uninterpretable. The only object in the UAP incident that can be explained is a large leaky balloon. The report pointed out that some UAPs exhibit characteristics that are unattainable by ordinary aircraft. There is no data to show that UAPs are foreign intelligence gathering programs, and there is no evidence that they originated from the rapid technological advancement of an opponent in the United States.

Not only in modern times, but thousands of years ago, there are also many records about UFOs.

Among the collections of the Ancient Egypt Exhibition Hall in the Vatican is an ancient book. It records about 1440 BC, and witnessed the scene of UFO group flying by. After historian's translation, the general content is as follows: At about 6 o'clock that morning, someone suddenly saw a UFO with flashing light in the sky. They have never seen this kind of sight. The UFO has no obvious head, and it emits a burst of unpleasant smell. The overall outer diameter of the UFO is about 45 meters, and it is hovering in the air.

In 354 BC, Chinese historian Zhang Zuo witnessed the emergence of UFOs. According to his records in the history books, the sky was quite bright that night, and the sound throughout the night was very loud, and a circular flying saucer appeared.

We believe that there are more cases hidden in this. This is a process of generalization from the individual to the whole, that is, if we find a case, it can prove that the existence of aliens has become a fact.

In summary, we believe that aliens exist.
